SUMMERY

- Total 4 years of experience in complete software development life cycle since my graduation in which I worked in different environments, from mid-scale companies to start-ups.
- Expertise is in HTML, CSS, JavaScript, MEAN and MERN stack.
- Pursuing a great skill set of managing and supporting multiple development projects
- Outstanding problem solving and decision making skills in the development era.
- Passionate for usability & user experience with technical knowledge to create cool digital experiences.
- Holding a strong, clear view towards the analysis and design of database and user interface along with API's spec.
- Believe to take overall responsibility for the day-to-day operations of the project, reporting periodically to all the managers.
- Highly adaptable in quickly changing technical environments with very strong organizational and analytical skills.
- My repertoire includes programming languages and tools such as JavaScript, TypeScript, Angular, React, Node JS, Express Js, MySQL, MongoDB, Heroku etc.

EDUCATION

BE in Computer Science / NKOCET, SOLAPUR(WITH FIRST CLASS)

Diploma in Information Technology / GOVERNMENT POLYTECHNIC COLLEGE , SOLAPUR(WITH FIRST CLASS)

SSC / B.F. DAMANI HIGH SCHOOL, SOLAPUR(WITH DISTINCTION)

PROFESSIONAL EXPERIENCE

SAZINGA DIGITAL SERVICES PVT. LTD (Present) / **TECHKNOMATIC SERVICES PVT. LTD**—Royal Empress, Baner road, Baner, Pune.
Techknomatic Services Pvt. Ltd *merged the development process with* SAZINGA DIGITAL SERVICES PVT. LTD *in Oct 2019.*

Senior Software Developer, Oct 2019 to Present
Technology Analyst, Oct 2018 to Oct 2019

Project: Sthal Matrimony Web and Mobile Platform

Sthal is an exclusive Marathi matrimony platform providing the most trusted and verified profiles for finding a life partner in the Marathi community. Application builds with multiple features such as real-time chats, Boost, Automatic Profile Matching by understanding user behaviors, dynamic in-app advertising, payment gateway, Simple OTP based login system, and much more.

Technologies: Angular 8, Ng-Prime, Bootstrap 4, Nodejs, ExpressJs, MongoDB,, Socket.io, Firebase, Zoho CRM, Paytm Payment Gateway, Aws S3, Digital Ocean, WIX

Responsibilities:

- Develop and maintain projects from scratch.
- Responsible in all phases of development from requirement gathering , database design , system architecture for backend and frontend and system improvement.

- Improve user engagement by providing multiple features in application such as profile matching algorithm , profile boost and real time chat system..
- In the one year of the project we reached a user base by 60% ,With help of providing clean and stable mobile application releases.
- Responsible for full-stack development for the whole admin web portal to maintain and access the user stages with many features like manual payments, different reports, push notifications etc.

Project: Waaahh

Waaahh is a real-time web-based appreciation portal. It is itself one of the modules of HR management software. Waaahh provides a platform to the users to make appreciation notes to the colleagues, staff, members of their organization with the option to publish the note among all the members where others can like, dislike or comment to note. Also features like report note, unpublish etc

Technologies: Angular 7, Ngx-Bootstrap, HTML , CSS , PHP La-ravel- lumen, MySQL

Responsibilities:

- Responsible in all phases of front-end development from requirement gathering , mockups designing , Integrating designs with business logic using Angular , front-end system architecture and system improvement.
- Responsible for deploying applications on shared GoDaddy servers & managing post deployment.

Project: LeadeX - Lead Management Software

LeadeX is the lead management portal for the organization's to manage their leads by basic, lite, professional and manager user's to track those leads status..

Technologies: React 16, NodeJS, ExpressJs,MySQL, Fabbly database, JIRA software

Responsibilities:
- Understanding the actual flow of the existing system and solving the bugs.
- Understand new requirements of new modules from BA and complete those in time.
- Report day-to-day operations of the project in JIRA, Reporting periodically to all the managers and update status to client contact person on daily scrum call

Project: TrueView

TrueView is a product of VOLON. TrueView is an intelligence driven vulnerability management and orchestration platform. It helps to prioritize the vulnerabilities and assets using seamless integration of third party scanners. It is also integrated with ticketing systems to help security teams track actions on the discovered vulnerabilities.

Technologies: Angular 8, Bootstrap 4, Ng-Bootstrap, HTML , CSS , Google Charts, NodeJS, Sequelize, MySQL

Responsibilities:

- Understand existing flow of the project and development.
- Work on 2FA authentication by scanning QR code
- Design and Develop angular components for different modules.

OSKAR TECHNOLOGIES — Nirpaam Society, Ashok Nagar, Solapur.
I have worked with OSKAR TECHNOLOGIES *for 2 years since my graduation.*

Senior Software Developer, Oct 2016 to Sept 2018

Project: Witty-Kitty

Witty-Kitty is the wittiest hangout portal for those crazy individuals who like to answer every simple question in the wittiest way. The underhood motto of this social media platform to make traffic and user engagement by fun and entertainment.

Technologies: Angular Material, HTML, CSS, PHP, MySQL

Responsibilities:

- Understand the existing system which was developed in angular js and do technical support for it.

- Design from scratch using Angular Material and Angular 6 version as per provided XD design

- Integrate the api's. Worked on FB and Google authentication for sign in.

Project: Customer Relationship Management (CRM)

CRM is provided with one client based ERP to maintain good relation with their end user by sending them SMS, Mail's on birthday and festival location. Billing software is also integrated with this.

Technologies: JavaScript, jQuery, HTML, CSS, PHP, MySQL

Responsibilities:

- Worked on all phases of SDLC with Full Stack Development.

- Integrate the api's. Worked on TextLocal SMS api integration.
